

24th November 2025

Dear Parents/Carers,

Suspected case of measles

As we approach the winter months, it is common for schools to see an increase in viral infections such as cold, flu, respiratory virus, norovirus, scarlet fever, chickpox, hand, foot and mouth to name a few.

We have been informed that there is a suspected case of measles at the school. Please read through the information sheet found [here](#)

If you feel that your child is displaying any of the listed symptoms, please seek medical advice as soon as possible.

Please be assured that we are continuing to follow good hygiene practises to mitigate the spread of such illnesses.

Kind regards

The Nursery Team
